

TESDA emphasizes following **OHS (Occupational Health & Safety)** before performing computer servicing.

These are the essential items you must equip before playing the game or performing maintenance.

Safety Gloves Purpose:

- Protect hands from sharp edges inside the system unit (metal casing, screws).
- Prevent cuts when handling tools or components.

ESD Gloves

When to Use:

- Opening the system unit
- Handling parts like HDD, GPU, PSU
- Cleaning internal components

Anti-Static Wrist Strap (ESD

Strap) Purpose:

- Prevent **Electrostatic Discharge (ESD)** that can damage sensitive components like RAM, motherboard, and processors.

How to Use:

- Attach one end to your wrist
- Clip the other end to an unpainted metal surface of the PC case

TESDA Reminder:

ESD protection is **mandatory** when touching internal components.

Safety Goggles Purpose:

- Protect your eyes from dust particles
 - Prevent irritation when using compressed air or brushes
- When to Use:**
- Cleaning fans, power supply vents
 - Blowing dust using air duster
 - Using isopropyl alcohol or small cleaning tools
