

Lesson Overview

Troubleshooting is like solving a mystery.

TESDA NC II requires technicians to **observe symptoms**, identify the **root cause**, and match each problem to its correct solution.

In this scene, players must **diagnose common hardware and network issues**.

Common Problems & Their Usual Causes

“No Display”

Possible Fault:

- Loose or faulty **RAM**
- Unseated GPU
- Faulty monitor cable

Clue:

Computer powers on but screen stays black.

“No Power”

Possible Fault:

- Faulty PSU
- Loose power cable
- Defective power button

Clue:

No lights, no fans spinning.

“Slow Network”

Possible Fault:

- Incorrect or conflicting **IP address**

- Weak Wi-Fi signal
- Faulty network cable

Clue:

Internet works intermittently or “No connection.”

“Overheating”

Possible Fault:

- Dusty CPU fan
- Cables blocking airflow
- Dried thermal paste

Clue:

Fan gets loud, PC suddenly freezes.
